

# Cosmograph Daytona

Oyster, 40 mm, platinum

**The Oyster Perpetual  
Cosmograph Daytona in  
platinum with an ice-  
blue dial and contrasting  
counter rings. It features  
an Oyster bracelet and a  
chestnut brown  
Cerachrom bezel with  
tachymetric scale.**

ICE-BLUE DIAL

## With chronograph counters

This model features an ice-blue dial with spray-coated counters, 18 kt gold applique hour markers and hands with a Chromalight display, a highly-legible luminescent material.

The dial allows drivers to accurately map out their track times and tactics without fail.

THE TACHYMETRIC SCALE

# High-performance chronograph

A key part of the model's identity is the bezel moulded with a tachymetric scale for measuring average speeds of up to 400 miles or kilometres per hour. The monobloc Cerachrom bezel in high-tech ceramic offers a number of advantages: it is corrosion resistant, virtually scratchproof and the colour is unaffected by UV rays.

This extremely durable bezel also offers an exceptionally legible tachymetric scale, thanks to

the deposition of a thin layer of platinum in the numerals and graduations via a PVD (Physical Vapour Deposition) process. The monobloc Cerachrom bezel is made in a single piece and holds the crystal firmly in place on the middle case, ensuring waterproofness.

PLATINUM

## The noblest of metals

Rare and precious, platinum is striking for its silvery whiteness and vibrant luminosity. It is among the densest and heaviest metals in the world, distinguished by unique chemical and physical properties such as exceptional corrosion resistance.

Paradoxically, it is also soft, elastic and highly malleable, which makes machining and polishing especially difficult, demanding an extremely high degree of skill. Rolex always uses 950 platinum, an alloy consisting of 950‰ (thousandths)

platinum, painstakingly crafted in-house by the fine metalworkers at Rolex. The noblest of metals for the finest of watches.

THE OYSTER BRACELET

# Alchemy of form and function

The design, development and production of Rolex bracelets and clasps, as well as the stringent tests they face, involve advanced high technology. And, as with all the components of the watch, aesthetic controls by the human eye guarantee impeccable beauty.

The Oyster bracelet is a perfect alchemy of form and function. First introduced in the late 1930s, this particularly robust and comfortable metal

### model-case

---

**type**

Oyster, 40 mm, platinum

**diameter**

40 mm

**material**

Platinum

**bezel**

Chestnut brown monobloc  
Cerachrom bezel in ceramic with  
moulded numerals and graduations

**case-back**

Transparent case back with anti-  
reflective coating

**oyster-architecture**

Monobloc middle case, screw-down  
case back and winding crown

**winding-crown**

Screw-down, Triplock triple  
waterproofness system

**crystal**

Scratch-resistant sapphire

**water-resistance**

Waterproof to 100 metres / 330  
feet

### movement

---

**type**

Perpetual, mechanical chronograph,  
self-winding

**calibre**

4131, manufacture Rolex

**precision**

-2/+2 sec/day, after casing

**oscillator**

Paramagnetic blue Parachrom hairspring. High-performance Paraflex shock absorbers

**winding**

Bidirectional self-winding via Perpetual rotor

**power-reserve**

Approximately 72 hours

**functions**

Centre hour and minute hands, small seconds hand at 6 o'clock. Chronograph via centre seconds hand, 30-minute counter at 3 o'clock and 12-hour counter at 9 o'clock. Stop seconds for exact time setting

**bracelet**

---

**type**

Oyster, three-piece solid links

**clasp**

Folding Oysterlock safety clasp with Easylink 5 mm comfort extension link

**bracelet-material**

Platinum

**dial**

---

**type**

Ice blue, chestnut brown counter rings

**details**

Highly legible Chromalight display with long-lasting blue luminescence

**certification**

---

**type**

Superlative Chronometer (COSC + Rolex certification after casing)
